

RESIN INJECTION MOLDED ARTICLE WITH REINFORCING OR  
DECORATIVE CORE

5

ABSTRACT OF THE DISCLOSURE

10       A resin injection molded article comprising at least  
a two-dimensional reinforcing core material formed into a  
non-planar shape, a resin surface layer covering the  
surface of the core material, and a resin-made structural  
member formed integrally with the resin surface layer and  
15       protruding from the resin surface layer, wherein the  
resin surface layer and the structural member are  
integrally molded by injection molding. The two-  
dimensional core material may be used as a design.
